

Warning! SBS copies on the market

Motorcycle brake pads of a very poor quality have been identified in China and Japan.

We have discovered that a Chinese company are producing brake pads of poor quality and selling these as SBS parts.

We have found these products in China and now also on a Yahoo internet auction on the Japanese market. Packed in an SBS look-alike packaging.

Until now we do not know if these fake products are sold on other markets.

However in order to avoid further misuse we ask for your attention: Please keep eyes and ears open when looking for or buying SBS brake pads and also if possible report any suspicious incident to us.

Visual characteristics of fake product

Original SBS product:

SBS logo, ref. number and compound code in inkjet print

Batch number stamped into the back plate

No holes in the back plate

Copy of SBS:

No printing or stamping

Holes in backplate

**Original SBS packaging:**

SBS ref number inkjet printed on carton

Different type designations in artwork: Ceramic, Sinter, Dual Carbon etc. according to pad type

Packed with soft and tight shrink wrap

SBS sticker always included under the pads

Copy of SBS packaging:

No printed ref. number

Ceramic/STREET artwork used for all compound types

Mounting holes punched in the carton

No SBS sticker included

Hard plastic cover – do not fit tight to pads

If you find or see something suspicious!

Please contact sbs-friction@sbs-friction.dk

Photo documentation and location for observation would be very helpful!
