HOW TO CHOOSE
YOUR BRAKE PADS

GO AHEAD

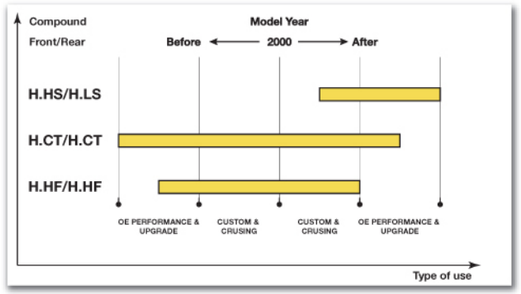

THE RIGHT CHOICE FOR YOUR MOTORCYCLE AND YOUR RIDING STYLE.

1. Choose your motorcycle type "Street Motorcycles", "V-Twin / American Motorcycles", "Off Road / Motocross", "ATV / UTV", "Road Racing", "Street use - scooter".
2. Find your "Type of use" in the matching diagram.
3. Pick the compound matching your needs and requirements.
4. Go to the "Motorcycle Model Applications" section to find your bike and matching SBS brake pad numbers.

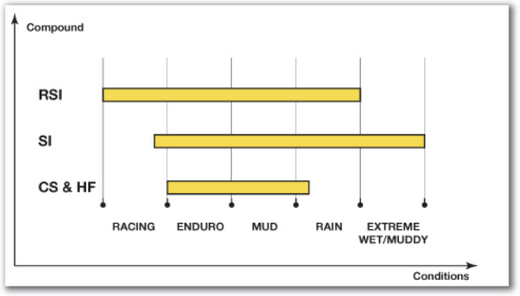

STREET MOTORCYCLES

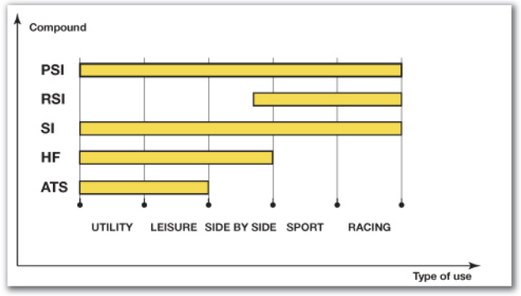

V-TWIN / AMERICAN MOTORCYCLES

OFF ROAD / MOTOCROSS

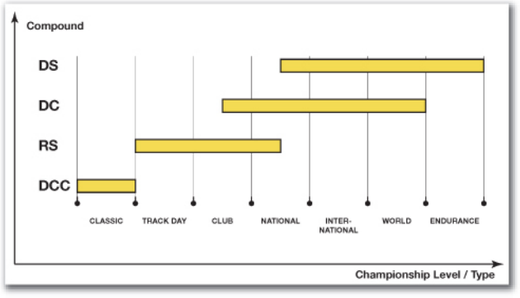

ATV / UTV

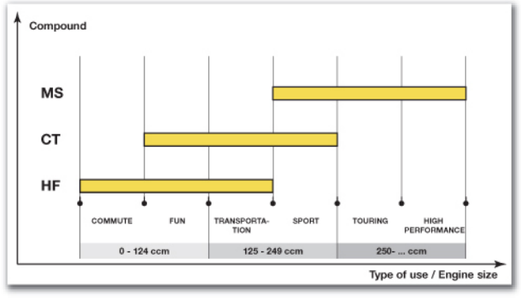

Choose ATS compound for older Arctic Cat and Polaris with **plain steel discs**.

ROAD RACING

STREET USE – SCOOTER

GO AHEAD

OFFICIAL BRAKES OF AMERICAN FLAT TRACK

SBS BRAKE ROTORS

The SBS range of brake rotors is developed in accordance with our world famous, recognized SBS disc brake pad range.

This means that for most reference numbers in the SBS brake pad range, you can find a corresponding SBS brake rotor.

Please find all rotors and applications at sbsbrakes.com.

WELCOME TO SBS

SBS Friction A/S is a Danish based company that develops, produces and markets brake pads and friction solutions for motorcycles, scooters, ATV/UTVs, special cars and industrial applications including wind turbines.

Further, our product range includes other brake components such as brake rotors, brake shoes, and accessory parts such as brake pins.

Our history goes back to 1964. In the 1970s we were the first to introduce aftermarket rotor brake pads for motorcycles. Since then we have continuously expanded our range, and our market coverage is almost complete no matter make, model or year. We are first with the newest and last with the oldest.

We are number one 1 in the European aftermarket for motorcycle brake pads, and all over the globe the SBS name is known for braking excellence. Totally, our distribution network is spread to around 50 countries around the world including the USA, Canada, Japan, Australia and the European Union.

Our customer portfolio comprises motorcycle industry OEMs such as brake system and vehicle manufacturers, and due to our friction know-how other industries such as wind turbines manufacturers.

Our headquarters, R&D, production and sales are located in Svendborg, Denmark. Our production plant features around 12,000 sqm with production lines for ceramic, sintered and carbon material components.

We employ around 200 people and our turnover has increased steadily since we introduced our first brake pad.

BIENVENUE DANS SBS

SBS Friction A/S est une société danoise qui développe, produit et commercialise des plaquettes de frein et des solutions de friction pour les motos, les scooters, les quads ou autres véhicules TT, les véhicules spéciaux et les applications industrielles comme les éoliennes.

Notre gamme de produits comprend en outre d'autres composants de freinage comme les disques de frein et les segments de frein, mais aussi des accessoires comme les axes de frein.

Notre histoire a commencé en 1964. Dans les années 1970, nous avons été les premiers à proposer des plaquettes de frein de rechange pour les motos. Depuis, nous avons continué à développer notre gamme et notre couverture du marché est aujourd'hui pratiquement totale, quels que soient la marque, le modèle ou l'année. L'innovation est notre marque de fabrique !

Nous sommes numéro un sur le marché européen du rechange en matière de plaquettes de frein pour les motos et la marque SBS est synonyme d'excellence de freinage partout dans le monde. Au total, notre réseau de distribution est présent dans près de 50 pays répartis sur toute la planète, y compris aux États-Unis, au Canada, au Japon, en Australie et dans l'Union Européenne.

Notre portefeuille de clients regroupe des OEM du marché de la moto comme des fabricants de systèmes de freinage et des constructeurs automobiles, mais aussi, grâce à notre savoir-faire en matière de friction, des constructeurs d'éoliennes.

Notre siège social, notre service R&D, notre site de production et notre service commercial se trouvent à Svendborg, au Danemark. Notre site de production s'étend sur près de 12 000 m² et nos chaînes produisent des composants en céramique, frittés ou en carbone.

Nous employons près de 200 personnes et notre chiffre d'affaire n'a fait qu'augmenter avec une belle régularité depuis la production de nos premières plaquettes de frein.

BRAKE PADS APPROVED ACCORDING TO ECE R90

ECE R90 UNDER IMPLEMENTATION

The ECE R90 regulation specifies design, construction, and performance requirements and test protocols for replacement brake parts for road going motor vehicles.

SBS has of course applied for approval according to the new ECE R90 regulation for the full range of friction materials that can potentially be used on public roads. You can see on the product pages (pages 5 – 23) which ones are marked “under ECE R90 approval”. Some groups have been approved already – some are still awaiting the conclusive tests.

Your safety – your benefits
ECE R90 tests speed sensitivity and cold performance. Since the lining is part of the braking system converting the vehicle’s kinetic energy into heat, the lining must be capable of surviving high temperatures without excessive wear (leading to frequent replacement) or outgassing (which causes brake fade, a decrease in the stopping power of the brake).

Furthermore ECE R90 requires correct marking of the products and sealed packaging.

A factory & test equipment approval is also part of the R90 homologation. It involves engineers inspecting and accrediting the factory once a year. SBS of course holds the approval for both manufacturing and testing facilities.

Type-approval to ECE R90 is required for all replacement brake linings throughout the European Union and in non-European countries that have adopted ECE Regulations.

How to test – the practicalities
The brake pads are divided into 3 categories – A, B and C - depending on area of the friction material, and all compounds are tested individually.

All vehicles recommended for the specific brake pad compound must be calculated according to the kinetic energy to find the most severe vehicle for testing.

This way all compounds and vehicles are checked and the most severe combinations tested on track, for the consumer to get a very safe and secure product.

In short : your guarantee for reliable OEM replacement quality.

We strongly recommend that you always check that the brake pads you chose have the proper ECE R90 approval.

PLAQUETTES DE FREIN APPROUVÉES SELON LA NORME ECE R90

ECE R90 UNDER IMPLEMENTATION

La réglementation ECE R90 définit les exigences de conception, de construction et de performances ainsi que les protocoles de test des pièces de freinage de rechange destinées aux véhicules routiers à moteur.

SBS a bien sûr demandé l’approbation selon la nouvelle réglementation ECE R90 de l’ensemble de sa gamme de matériaux de friction pouvant être potentiellement utilisés sur la voie publique. Vous pourrez voir dans les pages d’informations sur les produits (pages 5 – 23) lesquels sont marqués « en cours d’approbation ECE R90 ». Certains groupes de produits ont déjà été approuvés. D’autres attendent encore la conclusion des tests.

Votre sécurité – vos avantages
La réglementation ECE R90 teste la sensibilité à la vitesse et les performances à froid. La garniture faisant partie intégrante du système de freinage en convertissant l’énergie cinétique du véhicule en chaleur, elle doit être capable de résister à de fortes températures sans usure excessive (qui conduirait à un remplacement fréquent) ni dégazage (qui causerait une perte d’efficacité des freins et une diminution de la puissance de freinage).

La réglementation ECE R90 requiert en outre un marquage correct des produits et un emballage scellé.

L’approbation des équipements de tests et de l’usine fait également partie du processus d’homologation R90. Ceci implique l’inspection de l’usine et son accréditation par des ingénieurs une fois par an. SBS a bien sûr obtenu l’approbation à la fois de ses installations de test et de ses sites de production.

Une approbation de modèle ECE R90 est requise pour toutes les garnitures de frein de rechange dans l’Union Européenne mais aussi dans les pays non européens ayant adopté les réglementations ECE.

Méthode de test - Modalités pratiques pour une garantie de qualité supérieure
Les plaquettes de frein sont divisées en 3 catégories - A, B et C - en fonction du matériau de friction et tous les composés sont testés individuellement.

Tous les véhicules recommandés pour un composé de plaquette de frein spécifique doivent faire l’objet d’un calcul de l’énergie cinétique afin de trouver le véhicule le plus exigeant à tester.

De cette manière, tous les composés et tous les véhicules sont contrôlés, et les combinaisons les plus exigeantes sont testées sur piste, afin que le client bénéficie du produit le plus sûr possible.

En résumé : votre garantie pour une qualité et une fiabilité des pièces de rechange dignes des pièces d’origine.

Nous vous conseillons vivement de toujours vérifier que les plaquettes de frein que vous avez choisies disposent de l’approbation ECE R90.

LICENSE TO ADVENTURE

If a street bike is the best thing you own. If you are dedicated to touring and adventures on weekends and holidays. If you enjoy the freedom of motorcycle riding. Or if you are commuting every day.

Then SBS STREET brake pads are the right choice for you. Our STREET compounds are developed to match all makes, models and age of street bikes on the market – front and rear.

They give you the performance, lifetime and comfort that you need to GO AHEAD.

Choose between:
// PERFORMANCE – HS / LS
// PERFORMANCE UPGRADE – SP
// STANDARD – HF

Follow our recommendations for the ideal pads for your bike.

Si votre moto de route est votre meilleure alliée. Si vous êtes friand de randonnées et d'aventures à moto pendant les week-ends et les vacances. Si vous aimez la liberté qu'offre la conduite d'une moto. Ou simplement si vous allez tous les jours travailler en moto.

Alors les plaquettes de frein SBS STREET sont faites pour vous. Nos composés STREET ont été développés pour s'adapter à toutes les marques, tous les modèles et toutes les générations de motos routières du marché, à l'avant comme à l'arrière.

Elles vous offrent les performances, la longévité et le confort dont vous avez besoin pour ALLER PLUS LOIN.

Choisissez entre les versions :
// PERFORMANCE – HS / LS
// PERFORMANCE UPGRADE – SP
// STANDARD – HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

PERFORMANCE

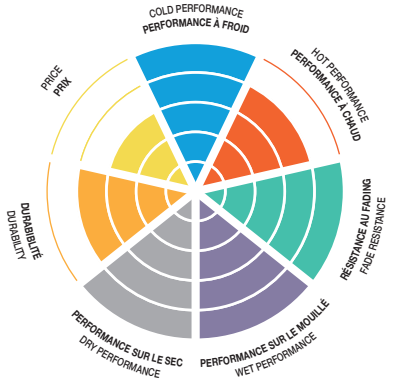

ECE R90
UNDER IMPLEMENTATION

HS - SINTER

FRONT / AVANT

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport, big touring and adventure bikes
// Sintered compound formulated for low wear, high thermal stability, excellent brake feel and easy modulation
// HH rated performance, developed in racing and fine-tuned for street use
// Excellent for stainless steel or cast iron brake rotors
// Front (HS) and rear (LS) compounds for ideal brake balance, to avoid rear wheel lock-up

// Composé de rechange Haute Performance pour motos équipées d'origine de plaquettes frittées.
// Conçu pour les motos modernes hautes performances sportives, routières ou destinées à l'aventure
// Composé fritté formulé pour une faible usure, une stabilité thermique élevée, une excellente sensation de freinage et une modulation facile.
// Composé aux performances supérieures exceptionnelles, conçu pour la compétition et la route.
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Composés avant (HS) et arrière (LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière

Brake performance diagrams to be compared individually within STREET compounds only.

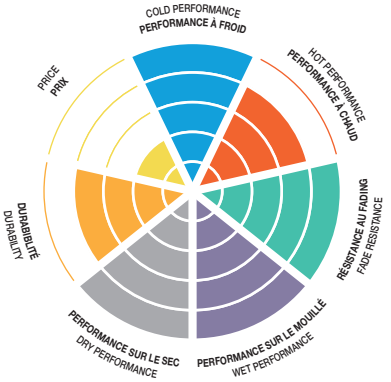

ECE R90
UNDER IMPLEMENTATION

LS - SINTER

REAR / ARRIÉRE

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport and big touring bikes
// Sintered compound offering predictable and controllable performance for rear wheel use
// Exclusive rear wheel compound formulated according to OEM concept offering ideal front/rear brake balance, to avoid over-braking and rear wheel lock-up

// Composé de rechange pour motos équipées d'origine de plaquettes frittées
// Conçu pour les motos modernes hautes performances, sportives et routières
// Un composé fritté destiné aux roues arrière offrant des performances prévisibles et contrôlables
// Composé exclusif pour les roues arrière, formulé selon le concept OEM et offrant un équilibre de freinage avant/arrière optimal pour éviter un freinage excessif et le blocage de la roue arrière.

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

PERFORMANCE UPGRADE / STANDARD

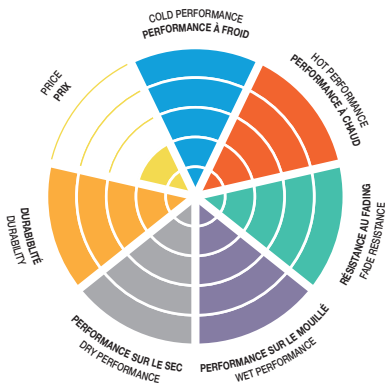

ECE R90
UNDER IMPLEMENTATION

SP - EVO SINTER

FRONT / AVANT

// OE replacement and upgrade compound for modern cruisers, sport, adventure & touring bikes
// State-of-the-art conductive sintered EVO compound formulated for strong initial bite to give instant brake feel, easy modulation and powerful in-stop performance
// Fade free, consistent and reliable performance under extreme riding conditions and throughout brake pad lifetime
// High thermal stability in combination with long pad lifetime and very low brake rotor wear
// Exceeds HH friction rating
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound – first time ever used on a sinter compound pad
// Front (SP) and rear (LS) compounds for ideal brake balance, to avoid rear wheel lock-up

// Composé de rechange Haute performance pour les motos modernes Touring, les roadsters, les motos sportives et routières hautes performances
// Composé EVO fritté conducteur à la pointe de la technologie, formulé pour offrir un freinage instantané et puissant, et une modulation facile.
// Des performances fiables, uniformes et exemptes de fading même dans des conditions de conduite extrêmes et durant toute la durée de vie des plaquettes de frein
// Stabilité thermique élevée associée à une longue durée de vie des plaquettes et une très faible usure des disques de frein
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Composés avant (SP) et arrière (LS) offrant un équilibre de freinage parfait pour supprimer le risque de blocage de la roue arrière

Brake performance diagrams to be compared individually within STREET compounds only.

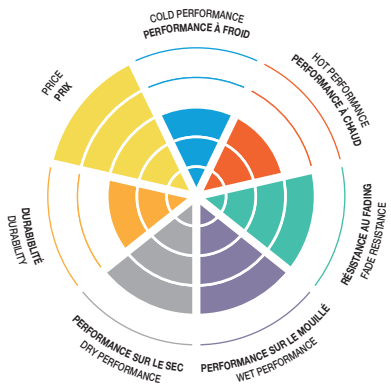

ECE R90
UNDER IMPLEMENTATION

HF - CERAMIC

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for bikes with non-sintered pads
// Designed for commuters, general-purpose street and cruiser bikes
// Ceramic compound offers long pad life, low dust and low brake rotor wear
// Excellent, consistent performance in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Innovative noise-reduction technology for high comfort and low development of noise

// Composé de rechange pour motos équipées d'origine de plaquettes non frittées
// Conçu pour les motos effectuant des trajets quotidiens, les motos routières polyvalentes et celles destinées aux longs périples
// Composé céramique offrant une longue durée de vie, peu de poussière et une faible usure du disque de frein/rotor
// Excellentes performances uniformes dans toutes les conditions, sèches ou humides
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé
// Technologie innovante de réduction du bruit pour un confort supérieur et une faible propagation du bruit

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants STREET.

LICENSE TO FREEDOM

If you have a passion for the American lifestyle, and the unique design and characteristics of the famous American motorcycle brands such as Harley Davidson, Victory and Indian, then SBS has the answer to your brake needs.

Our range of brake pads developed especially for American made motorcycles features compounds that unite high power with low noise and long lifetime. Our range has full coverage - vintage models back from the 70s as well as brand new American built bikes.

Choose between:
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Follow our recommendations for the ideal pads for your bike.

Si vous êtes passionné par le style de vie américain et par le design et les caractéristiques uniques des célèbres marques de motos américaines comme Harley Davidson, Buell et Indian, alors SBS a la solution qu'il vous faut en matière de freinage.

Notre gamme de plaquettes de frein spécialement conçue pour les motos américaines utilise des composés associant puissance élevée, bruit réduit et durée de vie prolongée. Notre gamme offre une couverture complète : des modèles vintage des années 80 aux toutes dernières motos des marques américaines.

Choisissez entre les versions :
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

LICENSE TO FUN

When it comes to city traffic, a scooter is often the ideal vehicle. In the dense traffic you have to rely on your brakes. The SBS scooter brake pads offer the ideal brake performance and durability for this environment.

We offer different compounds for different kinds of scooters and riding needs. Our market coverage is wide with pads and compounds to fit small 50 cc models all the way to modern, high performance maxi scooters.

Choose between:
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Follow our recommendations for the ideal pads for your scooter.

En ville, le scooter est souvent le véhicule idéal. Quand la circulation est dense, vous devez pouvoir compter sur vos freins. Les plaquettes de frein SBS Scooter offrent les performances de freinage et la longévité idéales pour cet environnement.

Nous proposons différents composés en fonction des différents types de scooters et de besoins. Notre gamme couvre tout le marché, allant des petits modèles 50 cm³ jusqu'aux maxi scooters modernes hautes performances.

Choisissez entre les versions :
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

LICENSE TO WIN

KENAN SOFUOGLU

For more than 25 years racing has been part of our DNA.

Through our Partners in Racing concept, we deliver the stopping power to the best of the best in racing. Whether it comes to international top level road racing such as World Superbike, Supersport , Endurance, The Isle of Man TT, National competitions, track days or classic road racing, SBS offers you the brake pads you need for gaining those important 100th of a second over the competition. Our race compounds are specially developed for competition and race track use – used by some of the World's best riders like Michael Dunlop, John McGuiness, Kenan Sofuoglu, Tom Luthi and the list goes on…

Choose between:
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RS
// RACING REAR – RQ / LS

Follow our recommendations for the ideal pads for your bike.

Depuis plus de 25 ans, la course fait partie de notre ADN.

À travers notre concept « Partenaires de compétition », nous offrons LE top freinage aux meilleurs teams et pilotes. Qu'il s'agisse des courses sur circuits les plus prestigieuses comme le Mondial Superbike, Supersport ou Endurance, les compétitions nationales, les journées circuit ou les classiques routières, SBS vous propose les plaquettes de frein dont vous avez besoin pour gagner d'importants 100èmes de seconde au freinage. Nos composés de course sont spécialement conçus pour la compétition et les circuits. Ils sont testés et approuvés par les plus grands pilotes du Championnat du Monde.

Choisissez entre les versions :
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RS
// RACING REAR – RQ / LS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

DYNAMIC RACING CONCEPT

FRONT / AVANT - FOR RACE USE ONLY

// The choice of numerous World Champions in Superbike, Supersport, Moto2 and Endurance
// High-tech sintered compound available for racing & standard brake systems used in racing
// DS-1 with an aggressive initial bite features and linear predictable in-stop performance
// DS-2 with a smooth initial bite and progressive in-stop performance
// A combination (left and right) of the two compounds makes fine tuning of braking performance possible
// NUCAP NRS technology secures mechanical bonding

// Le choix de nombreux champions du monde en Superbike, Supersport, Moto2 et Endurance
// Composé fritté haute technologie adapté aux systèmes de freinage de course et standard utilisés en compétition
// DS-1 Si vous préférez une réponse au freinage puissante et linéaire
// DS-2 Si vous préférez une réponse au freinage en souplesse et progressive
// Il est désormais possible d'associer les deux types; Disque de frein côté gauche -> DS-1, disque de frein côté droite -> DS-2. On obtient ainsi une combinaison des caractéristiques de performance des deux types.
// C'est-à-dire, un réglage fin des performances de freinage selon les préférences de freinage de chaque pilote
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Brake performance diagrams to be compared individually within RACING compounds only.

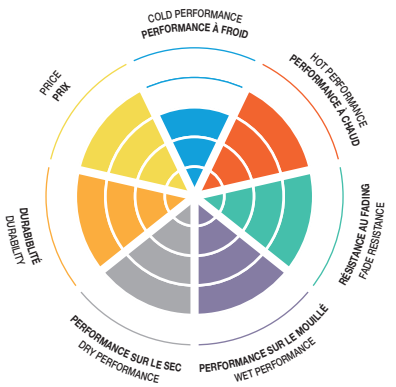

DC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The upgrade choice for Superbike, Supersport and Superstock racers in National Championship as well as for Track Day riders
// High-tech carbon compound developed for racing and standard brake systems used for race and sport bikes
// Low heat transfer rate protects brake system and brake fluid against extreme temperatures
// Smooth initial bite, progressive in-stop performance with excellent brake lever feel and modulation
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bond between the compound and backing plate
// Laser cut backing plate to prevent deformation

// Le composé de choix pour les pilotes de Superbike, Supersport et Superstock des championnats nationaux mais aussi pour les journées sur circuit ("Track days")
// Composé carbone haute technologie développé pour les systèmes de freinage de course et standard utilisés sur les motos de compétition et sportives
// Le faible taux de transfert de chaleur protège le système de freinage et le liquide de frein contre les températures extrêmes
// Mordant fluide, performances de freinage progressives avec une excellente sensation au niveau du levier de frein et une excellente modulation
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

ENDURANCE, CLASSIC RACING & ROAD RACING / ROAD RACING & TRACKDAYS

RACING
CLASSIC ROAD RACING

DCC - DUAL CARBON

FRONT / AVANT - FOR RACE USE ONLY

// The choice for classic road racing derived from more than 25 years of experience in World Championship racing and inspired by our championship winning DC Dual Carbon material
// Smooth initial bite, ideal for classic front fork construction and tires. Progressive brake performance offering superior power and front-end feel
// Thermal stability, suitable for single or dual rotor set-up. Compatible with stainless steel and cast iron brake rotors
// Low thermal conductivity reduces thermal load to seals, brake fluid and caliper parts
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Laser cut backing plate to prevent deformation

// Le choix qui s'impose pour les courses classiques sur route s'appuie sur plus de 25 ans d'expérience en Championnat du monde, inspiré par notre matériau carbone gagnant DC Dual Carbon
// Mordant fluide, idéal pour les fourches et les pneus avant classiques. Performances de freinage progressives offrant une puissance supérieure et une sensation avant-arrière optimale
// Stabilité thermique, adaptée aux configurations à 1 et 2 disques. Compatible avec les disques de frein en acier inoxydable et en fonte
// Faible conductivité thermique réduisant la charge thermique exercée sur les joints, le liquide de frein et les pièces des étriers
// Technologie DEST utilisée pour la pré-application du composé afin d'éliminer le fading et d'assurer des performances uniformes.
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

Due to the unique nature of the DCC compound, formulated especially for vintage racing, it is not possible to compare to other products.

En raison de la nature unique du composé DCC, formulé spécialement pour les courses de motos vintage, toute comparaison avec d'autres produits est impossible.

ECE R90
UNDER IMPLEMENTATION

RS - SINTER

FRONT / AVANT

// The ideal and affordable choice for track days and club racing. Can be used for street riding
// Sintered compound available for modern sportbike standard brake systems
// Excellent for stainless steel or cast iron brake rotors
// Strong initial bite, linear in-stop performance with good brake feel and control

NEW! 2020 - RS brake pads with NRS – even more strong
During 2020 SBS will launch a new range of RS brake pads improved with NRS Technology: The RSN/RSP/RS-2 brake pads. The NRS Nucap Retension System is an advanced mechanical bonding technology based on a matrix of steel hooks raised from the baking plate steel material. The NRS hooks mold into the friction material creating an indestructible and corrosion safe mechanical bond without any use of adhesives.
Main advantages of NRS technology compared to traditional methods:
// No separation between the back plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and back plate

// Le choix économique idéal pour les journées sur pistes (track days) et les motos combinant pistes et routes
// Composé fritté adapté aux systèmes de freinage standard des motos sportives et de course modernes
// Idéalement adapté aux disques de frein en acier inoxydable ou en fonte
// Mordant puissant, performances de freinage avec une bonne sensation de freinage et un contrôle maîtrisé

NOUVEAUTÉ ! 2020 Plaquettes de frein RS avec NRS - encore plus résistantes
Au cours de l'année 2020, SBS va lancer une nouvelle gamme de plaquettes de frein RS améliorées utilisant la technologie NRS : les plaquettes de frein RSN/RSP/RS-2. Le système de rétention NRS (Nucap Retention System) est une technologie de liaison mécanique avancée basée sur une matrice de crochets en acier redressés sur le plateau de frein en acier. Les crochets NRS viennent se mouler dans le matériau de friction, créant ainsi une liaison mécanique indestructible sans utiliser d'adhésif.
Principaux avantages de la technologie NRS par rapport aux méthodes traditionnelles :
// Absence de séparation entre le plateau de frein et le matériau de friction
// Absence de bords susceptibles de se soulever sur le matériau de friction et de provoquer un effet de levier solide
// Absence de vibrations entre le plateau de frein et le matériau de friction

ENDURANCE, CLASSIC RACING & ROAD RACING

ECE R90 UNDER IMPLEMENTATION

RQ - CARBON TECH

REAR / ARRIÉRE

// Rear brake carbon compound with high brake performance
// Excellent feel and control to use rear brake steering into turns and handle the bike out of turns

// Composé carbone pour frein arrière offrant d'impressionnantes performances de freinage
// Excellente sensation et contrôle aisé du frein arrière dans les virages, offrant une parfaite maîtrise de la moto en sortie de virage

ECE R90 UNDER IMPLEMENTATION

LS - SINTER

REAR / ARRIÉRE

// Rear brake sintered compound with medium brake performance and long pad life
// Recommended for riders using the rear brake occasionally or only slightly entering the turns

// Composé fritté pour frein arrière offrant des performances de freinage intermédiaires et une longue durée de vie de plaquettes.
// Recommandé pour les motards utilisant occasionnellement le frein arrière ou légèrement à l'entrée des virages.

LICENSE TO ACTION

Enjoying the freedom in the desert. Conquering rocks and mountains. Racing down the dirt track for podium positions.

When riding off road is your passion, SBS offers you the ideal brake compound for the aggressive environment of sand, dust, mud and water. Whether on motorcycle, ATV or UTV.

Choose between our racing pads for competition at all levels or the alternatives when riding off road for leisure and fun. Our range covers all off road makes and models and of course for both front and rear applications.

Choose between:
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Follow our recommendations for the ideal pads for your bike.

Apprécier la liberté dans le désert. Conquérir les collines et les montagnes. Avaler les kilomètres de pistes poussiéreuses jusqu'au podium.

Si la conduite hors des sentiers battus est votre passion, SBS propose un composé de frein idéal pour les environnements agressifs mêlant sable, poussière, boue et eau. Que ce soit pour les motos, les quads ou autres VU Tout Terrain.

Choisissez parmi nos plaquettes spéciales course pour la compétition à tous les niveaux ou d'autres versions adaptées à la conduite tout terrain pour les loisirs et le plaisir. Notre gamme couvre toutes les marques et tous les modèles tout terrain, à la fois pour les applications avant et arrière.

Choisissez entre les versions :
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Suivez nos recommandations pour trouver les plaquettes idéales pour votre moto.

FRONT / AVANT • REAR / ARRIÉRE

// Performance upgrade choice of MX GP World Championship MX GP and MX2 teams and riders
// Sintered compound formulated for high thermal stability, powerful and predictable fade-free performance
// Compatible with OE standard brake rotors and specially designed racing rotors

// Le choix Haute Performance des teams et des pilotes du Championnat du monde MX GP et MX2
// Composé fritté formulé pour une stabilité thermique élevée, une puissance supérieure et des performances prévisibles sans fading
// Compatible avec les disques de frein OE standard et les disques spécialement conçus pour la course.

Brake performance diagrams to be compared individually within OFF ROAD compounds only.

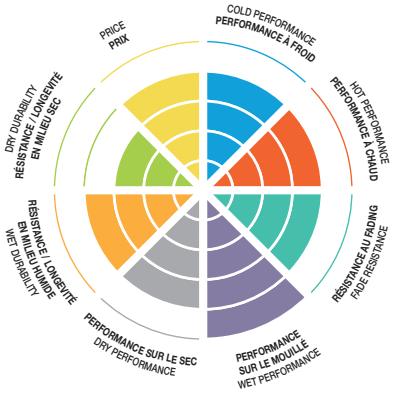

ECE R90 UNDER IMPLEMENTATION

SI - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// The upgrade choice for muddy, wet or sandy conditions
// Sintered compound formulated for extended service intervals, high performance and easy modulation
// Class-leading smooth performance developed in racing under severe conditions

// Le choix idéal pour la boue, les terrains humides et le sable
// Composant fritté formulé pour des intervalles d'entretien prolongés, des performances élevées et une modulation facile
// Composé aux performances d'une fluidité inégalée, conçu pour la compétition dans les conditions les plus difficiles

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

CLUB, TRAILS & LEISURE

PSI - EVO SINTER

FRONT / AVANT • REAR / ARRIÉRE

// Ultimate upgrade compound for ATVs and UTVs
// State-of-the-art conductive sintered EVO compound formulated for strong initial bite to give instant brake feeling, easy modulation and powerful in-stop performance
// Fade free, consistent and reliable performance under extreme conditions and throughout brake pad lifetime
// NRS Technology secures a mechanical and indestructible bonding of the compound

// Composé de rechange Haute performance pour les VTT et les UTV
// Composé EVO fritté conducteur à la pointe de la technologie, formulé pour offrir un freinage instantané et puissant, et une modulation facile
// Des performances fiables, uniformes et exemptes de fading même dans des conditions de conduite extrêmes et durant toute la durée de vie des plaquettes de frein
// La technologie NRS assure une liaison mécanique indestructible du composé

Brake performance diagrams to be compared individually within OFF ROAD compounds only.

Les diagrammes de performances de freinage ne doivent être comparés individuellement que dans le domaine des composants OFF ROAD.

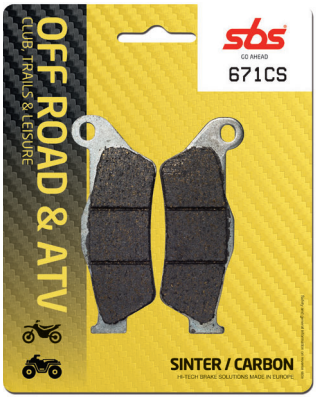

ATS - SINTER

FRONT / AVANT • REAR / ARRIÉRE

// OE replacement compound for combination with plain steel brake rotors
// Sintered compound compatible with OE standard plain steel brake rotors as used with older Arctic Cat & Polaris ATV models

// Composé de rechange à associer à des disques de frein en acier
// Composé fritté compatible avec les disques de frein en acier standard d'origine comme ceux utilisés sur les anciens modèles de quads Arctic Cat et Polaris

CS - CARBON

FRONT / AVANT • REAR / ARRIÉRE

// Affordable replacement choice for hobby motocross and competition
// Carbon compound offers smooth, quiet and non-grabbing performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound

// Composé de rechange abordable, idéal pour le motocross de loisir et de compétition
// Composé carbone offrant des performances fluides, silencieuses et sans broutage
// La technologie NUCAP NRS assure une liaison mécanique indestructible du composé

BRAKE SHOES WITH SPRINGS

MÂCHOIRES DE FREIN À RESSORTS

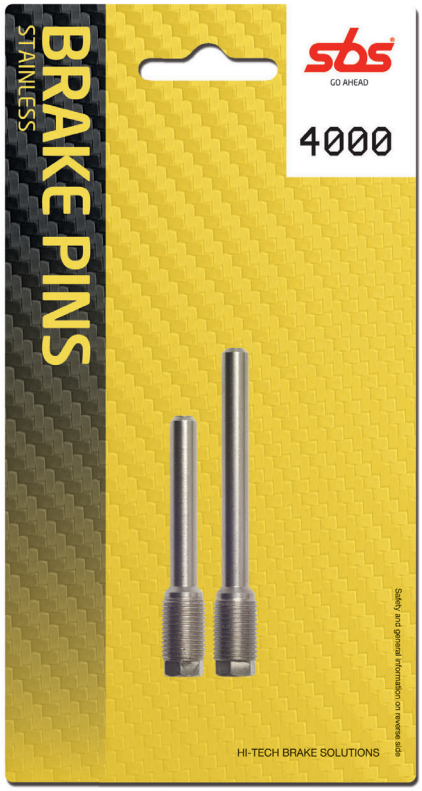

Asbestos-free brake lining for superior performance and durability under all weather conditions. High grade alloy for superior strength. Surface treated against corrosion. Brake shoe springs made of high quality spring wire steel according to DIN 17223 specifications for max. flexibility.

Garniture de frein sans amiante pour des performances et une longévité supérieures quelles que soient les conditions météo. Alliage haute qualité pour une résistance supérieure. Surface traitée contre la corrosion. Ressorts de mâchoires de frein fabriqués en fil d'acier conforme à la norme DIN 17223 pour une flexibilité maximale.

STAINLESS BRAKE PINS

AXES DE FREIN INOXYDABLES

The SBS stainless brake pin range covers the most common MX and Enduro bikes from the early 1990s until today.

The range comprises 5 complete sets, front and rear together, but are also available as single packs with only front or rear to the respective model. Brake pad pins get wear grooves after a while so it is recommended to replace them regularly in order to prevent stiction and poor performance.

// Made of high quality stainless steel 304
// 8 mm hex head for quick and easy change of brake pad (excl. ref 4003)
// Corrosion resistant
// Smooth sliding between pin and brake pads

La gamme d'axes de frein inoxydables SBS est adaptée aux motos MX et Enduro les plus courantes du début des années 1990 à aujourd'hui.

Cette gamme comprend 5 jeux complets, avant et arrière, également disponibles en packs unitaires contenant uniquement un axe avant ou arrière du modèle souhaité. Comme les axes des plaquettes de frein développent des rainures d'usure après un certain temps, il est recommandé de les remplacer régulièrement afin d'éviter le frottement au démarrage et de faibles performances.

// Acier inoxydable de haute qualité "304"
// Tête hexagonale de 8 mm pour un changement rapide et facile des plaquettes de frein (sauf réf. 4003)
// Résistance à la corrosion
// Glissement fluide des axes contre les plaquettes de freins

ACCESSORIES

BRAKE SYSTEM BLEEDER

Motorcycle brake system bleeder which allows quick, safe and clean exchange of brake fluid. Access to min. 6 bar air pressure is necessary. The bleeder is made of the best and most durable brake fluid resistant materials which means that it handles the highly corrosive brake fluid in a closed circuit. A special safety and “tip-over” valve, prevents the fluid to leak out when the container is full.

// Built-in ”tip-over” valve
// Turnable line fitting
// Additional 2-nipple line included
// Manual in 12 languages

Part number 5809839100
EPDM rubber units
Art. number 5809939100 (10 pcs.)

PURGEUR DE FREIN

Purgeur de système de freinage de moto permettant une vidange rapide, propre et sûre du liquide de frein. Nécessite de l’air comprimé à 6 bars minimum. Le purgeur est fabriqué avec les matériaux les plus durables résistant au liquide de frein, car il doit pouvoir supporter le liquide de frein hautement corrosif du circuit fermé. Une valve de sécurité spéciale « anti-refoulement » empêche le liquide de se vaporiser lorsque le réservoir est plein.

// Valve « anti-refoulement » intégrée
// Sens de fixation réversible
// Fourni avec 2 embouts supplémentaires
// Manuel disponible dans 12 langues

Réf. 5809839100
Embouts en caoutchouc EPDM
Réf. 5809939100 (10 pièces)

ACCESSOIRES

ANTI-NOISE SHIMS

// Vibration/noise resistant
// Temperature transfer resistant
// Piston protective
// Do not use for racing

Part number 9500

SHIMS POUR PLAQUETTES DE FREIN

// Résistants aux vibrations/bruit
// Résistants au transfert de température
// Protection du piston
// Ne pas utiliser pour la course

Part number 9500

GO AHEAD

HI-TECH BRAKE SOLUTIONS MADE IN EUROPE

At SBS, we develop and manufacture hi-tech brake solutions.

Our ranges of brake pads, brake rotors, brake shoes, clutch kits and other important parts cover all relevant motorcycles, scooters and ATV/UTVs on the market, regardless of make and model. SBS is your single source for brake parts and components.

We are a global market leader within brakes for powered two-wheelers. Our R&D department continuously innovates with new materials and technologies to achieve ultimate performance, longer lifetime, higher comfort and more eco-friendly products.

Our products are tested by reality. Dynamometer testing is supplemented with numerous street and race track tests. We work with some of the world's best road racing and motocross riders, when they race towards podium positions.

We create the power to stop you. Made in Europe. You decide where and how to use it. Go Ahead!
