TRY THE NEW BETTER BRAKES
FOR A BETTER BRAKE PERFORMANCE

We all need to do what we can to reduce our environmental impact, motorcyclists are no exception. Just not at the expense of performance!
SBS has refined its compounds to do exactly that, while also improved the brake performance throughout the brake pad lifetime. Get the improved lever feel, improved recovery, high heat resistance and stronger initial bite you seek, with the new SBS Better Brakes HF, HS and MS.

Better brakes, for a better ride. Go Ahead.

More see page 4-5.

BETTER BRAKES

REFINED COMPOUND

Brake compounds are 100% Copper- and Nickel-free, and for ceramic compounds also Antimony-free.

IMPROVED BRAKE PERFORMANCE

A better and more stable brake performance and stopping power.

NUCAP NRS TECHNOLOGY

Always equipped with the powerful bonding technology that binds the friction material to the backing plate and improves heat resistance.

HOW TO CHOOSE
YOUR BRAKE PADS

GO AHEAD

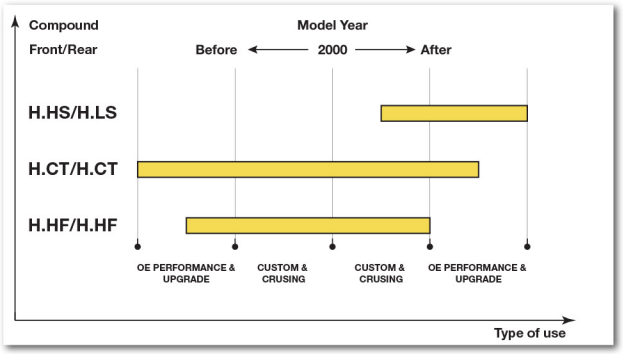

THE RIGHT CHOICE FOR YOUR MOTORCYCLE AND YOUR RIDING STYLE.

1. *Choose your motorcycle type "Street Motorcycles", "V-Twin / American Motorcycles", "Off Road / Motocross", "ATV / UTV", "Road Racing", "Street use - scooter".*
2. *Find your "Type of use" in the matching diagram.*
3. *Pick the compound matching your needs and requirements.*
4. *Go to the "Motorcycle Model Applications" section to find your bike and matching SBS brake pad numbers.*

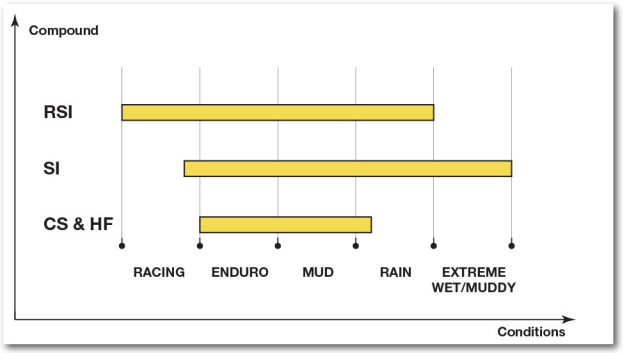

STREET MOTORCYCLES

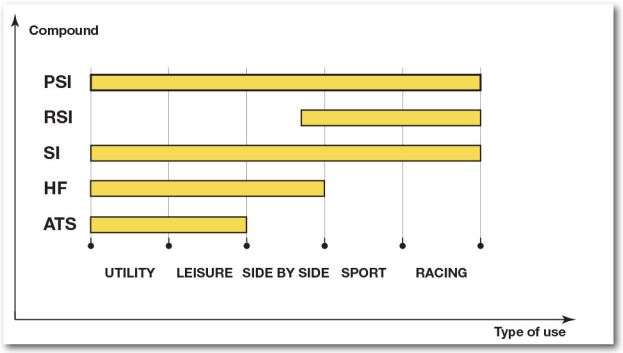

V-TWIN / AMERICAN MOTORCYCLES

OFF ROAD / MOTOCROSS

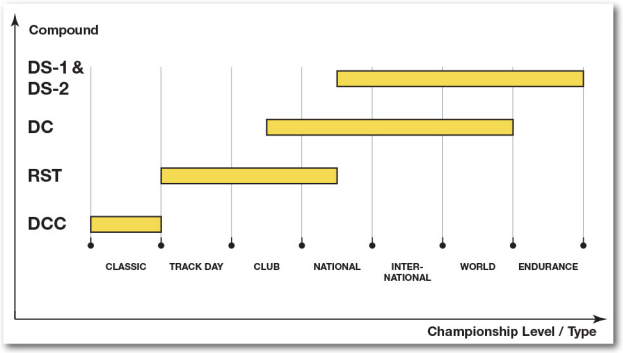

ATV / UTV

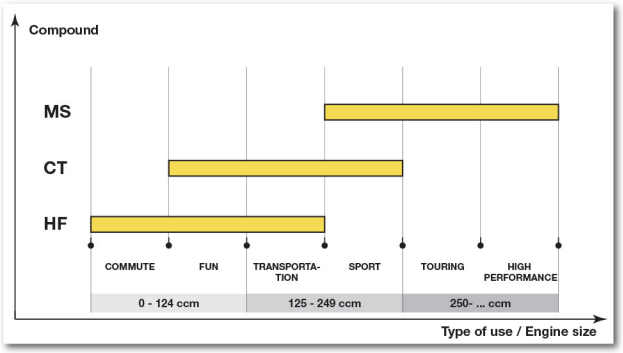

Choose ATS compound for older Arctic Cat and Polaris with **plain steel discs**.

ROAD RACING

STREET USE – SCOOTER

WELCOME TO SBS

SBS Friction A/S is a Danish-based company that develops, produces and markets brake pads and friction solutions for motorcycles, scooters, ATV/UTVs, special cars and industrial applications including wind turbines.

In addition, our product range includes other brake components such as brake rotors, brake shoes, and accessory parts such as brake pins.

Our history goes back to 1964. In the 1970s we were the first to introduce aftermarket disc brake pads for motorcycles. Since then we have continuously expanded our range, and our market coverage is almost complete no matter make, model or year. We are first with the newest and last with the oldest.

We are number #1 in the European aftermarket for motorcycle brake pads, and all over the globe the SBS name is known for braking excellence. Our total distribution network is spread to around 50 countries around the world including the USA, Canada, Japan, Australia, Singapore, South Africa and across the European Union.

Our customer portfolio comprises motorcycle industry OEMs such as brake system and vehicle manufacturers, and due to our friction knowhow, other industries such as wind turbines manufacturers.

Our headquarters, R&D, production and sales are located in Svendborg, Denmark. Our production plant features around 12,000 m^2 with production lines for ceramic, sintered and carbon material components.

We employ around 200 people and our inventory turnover has increased steadily since we introduced our first brake pad.

Just Go Ahead - We have the power to stop you!

BIENVENIDO A SBS

SBS Friction A/S es una empresa danesa que desarrolla, fabrica y comercializa pastillas de freno y soluciones de fricción para motocicletas, scooter, ATV/UTV, coches especiales y aplicaciones industriales, incluidos generadores eólicos.

Nuestra gama de productos incluye también componentes como discos de freno, zapatas de freno y otros accesorios (por ejemplo, tornillos de freno).

Nuestra historia se remonta a 1964. En la década de 1970 fuimos los primeros en introducir las pastillas de freno de disco en el mercado de piezas de repuesto para motocicletas. Desde entonces hemos seguido ampliando nuestra gama de productos hasta cubrir la práctica totalidad del mercado, con independencia de la marca, el modelo o el año de fabricación. Somos los primeros en ofrecer las novedades y los últimos en retirar los productos más antiguos.

Además de ser el número 1 en el mercado europeo de piezas de repuesto para pastillas de freno de motocicletas, SBS es sinónimo de excelencia en sistemas de frenado en todo el mundo. Nuestra red de distribución se extiende por unos 50 países de todo el mundo, entre ellos Estados Unidos, Canadá, Japón, Australia, Singapur, Sudáfrica y toda la Unión Europea.

Nuestra cartera de clientes incluye fabricantes de equipos originales para motocicletas (por ejemplo, sistemas de frenos) y fabricantes de vehículos, además de fabricantes de otros sectores de la industria, como fabricantes de generadores eólicos, gracias a nuestros conocimientos específicos en materia de fricción.

En nuestra sede de Svendborg (Dinamarca) se encuentran los departamentos de I+D, producción y ventas. Nuestra planta de cerca de 12 000 m2 incorpora líneas de producción de componentes de material cerámico, sinterizado y carbono.

Nuestra plantilla está integrada por cerca de 200 empleados y nuestra facturación ha aumentado de manera constante desde que presentamos nuestra primera pastilla de freno. En la actualidad somos líderes del mercado.

Adelante. Tenemos la fuerza para detenerle.

BRAKE PADS APPROVED ACCORDING TO ECE R90

The ECE R90 regulation specifies design, construction, and performance requirements and test protocols for replacement brake parts for road-approved motor vehicles.

SBS has as an industry-first received full approval according to the new ECE R90 regulation. You can see on the product pages (pages 7 – 25) which ones are marked “ECE R90 approved”. All future introductions are designed to meet the approval of the ECE R90 regulation.

Your safety – your benefits
ECE R90 tests speed sensitivity and cold performance. Since the lining is part of the braking system converting the vehicle’s kinetic energy into heat, the lining must be capable of surviving high temperatures without excessive wear (leading to frequent replacement) or outgassing (which causes brake fade, a decrease in the stopping power of the brake).

Furthermore, ECE R90 requires correct marking of the products and sealed packaging.

A factory & test equipment approval is also part of the R90 homologation. It involves a once-a-year inspection and accreditation by engineers. SBS, of course, holds the approval for both manufacturing and testing facilities.

Type-approval to ECE R90 is required for all replacement brake linings throughout the European Union and in non-European countries that have adopted ECE Regulations.

How to test – the practicalities
The brake pads are divided into 3 categories – A, B and C - depending on the friction material, and all compounds are tested individually.

All vehicles recommended for the specific brake pad compound must be calculated according to kinetic energy to find the most severe vehicle for testing.

This way, all compounds and vehicles are checked and the most severe combinations tested on track, for the consumer to get a very safe and secure product.

In short: your guarantee for reliable OEM replacement quality.

When you choose an Aftermarket replacement brake pad, we strongly recommend you check that the ECE R90 approval has been granted. With SBS you are safe – all our brake pads for public road use have been fully approved for all shapes, vehicle applications and compounds. Contact our Customer Service for more information: sbs@sbs.dk.

PASTILLAS DE FRENO CON HOMOLOGACIÓN ECE R90

En el reglamento ECE R90 se especifican tanto los requisitos de diseño, fabricación y rendimiento como los protocolos de prueba de las piezas de los frenos de recambio de los vehículos de motor que circulan por carretera.

En SBS hemos sido los primeros en obtener plena homologación con arreglo al nuevo reglamento ECE R90. En las páginas de producto (páginas 7 – 25) pueden verse los que están marcados con “Homologación ECE R90”. Las futuras incorporaciones se diseñarán de manera que cumplan los requisitos de homologación del reglamento ECE R90.

Su seguridad, su beneficio
El reglamento ECE R90 pone a prueba la sensibilidad a la velocidad y el rendimiento en frío. Como la guarnición forma parte del sistema de frenado y convierte la energía cinética del vehículo en calor, la guarnición debe ser capaz de resistir altas temperaturas sin que se produzca un desgaste excesivo (lo que conlleva sustituciones frecuentes) o desgasificación (causante del desvanecimiento de los frenos, equivalente a una reducción de la potencia de frenado del freno).

Asimismo, el reglamento ECE R90 exige que los productos estén marcados de manera correcta y se precinten los envases.

La aprobación de la fábrica y el equipo de prueba también forman parte de la homologación R90. Esto conlleva la inspección y la acreditación de la fábrica una vez al año por parte de ingenieros. Las instalaciones de pruebas y fabricación de SBS están homologadas.

En la Unión Europea y en los países extraeuropeos que hayan adoptado los reglamentos ECE se exige que las guarniciones de los frenos de recambio tengan la homologación ECE R90.

Cómo se prueban: aspectos prácticos
Las pastillas de freno se dividen en 3 categorías (A, B y C) dependiendo del área del material de fricción y todos los compuestos se prueban por separado.

En todos los vehículos en los que se recomiendan pastillas de freno concretas, el compuesto debe calcularse en función de la energía cinética para encontrar el vehículo con condiciones más estrictas para las pruebas.

De esta forma, se comprueban todos los compuestos y vehículos y se prueban en pista las combinaciones más exigentes con el fin de ofrecer al consumidor un producto muy seguro y estable.

En resumen, se garantiza un recambio OEM fiable y de calidad.

Al elegir una pastilla de freno posventa, recomendamos encarecidamente que cuente con la homologación ECE R90. Con SBS tiene la seguridad de que todos nuestros materiales para uso en la circulación se han homologado completamente en todas las formas, aplicaciones de vehículos y compuestos. Póngase en contacto con nuestro Servicio de atención al cliente para obtener más información: sbs@sbs.dk.

NEW!
SBS BETTER BRAKES

SBS is introducing a new type of compound that is both purer in composition and has improved performance characteristics. We call it SBS Better Brakes.

January 1st 2023 marks the launch of the first product series being transitioned into the new SBS Better Brakes compounds, HF, HS and MS. The new compounds are designed with purification and performance in scope. Sinter compounds will not contain copper and nickel - instead they are designed on an iron-based formula. HF compounds are purified and without antimony*.

0% COPPER *(for Sintered brake pads)*
NICKEL *(for Sintered brake pads)*
ANTIMONY *(for Ceramic brake pads)*

THE IDENTIFYER

To differentiate the old from the new, SBS is introducing the symbolic "Better Brakes icon" to its packaging. We do so also because product references (e.g. 706HS or 146MS) will remain as they are today, for the convenience of riders, dealerships and distributors.

TRANSITIONING PHASE

The first products to transition into SBS Better Brakes are HF, HS and MS. Production of SP will discontinue as of January 1st 2023. All SP product references will be merged into HS, making the preferred selection easier, based on a good-better-best principle.

Next in line in the transition plan by mid-2023 is the transition of RQ and CT products, followed by the transition of LS products and in 2024, SI products.

¡NUEVO!
SBS BETTER BRAKES

SBS presenta un nuevo tipo de compuesto que es más puro en su composición y que presenta unas mejores características de rendimiento. Lo llamamos SBS Better Brakes.

La fecha de transición de la primera serie de productos a los nuevos compuestos HF, HS y MS de SBS Better Brakes es el 1 de enero de 2023. Los nuevos compuestos han sido diseñados pensando en la purificación y el rendimiento. En lugar de latón y níquel, los nuevos compuestos han sido diseñados a partir de una fórmula basada en hierro. Los compuestos HF han sido purificados y no contienen antimonio*.

EL IDENTIFICADOR

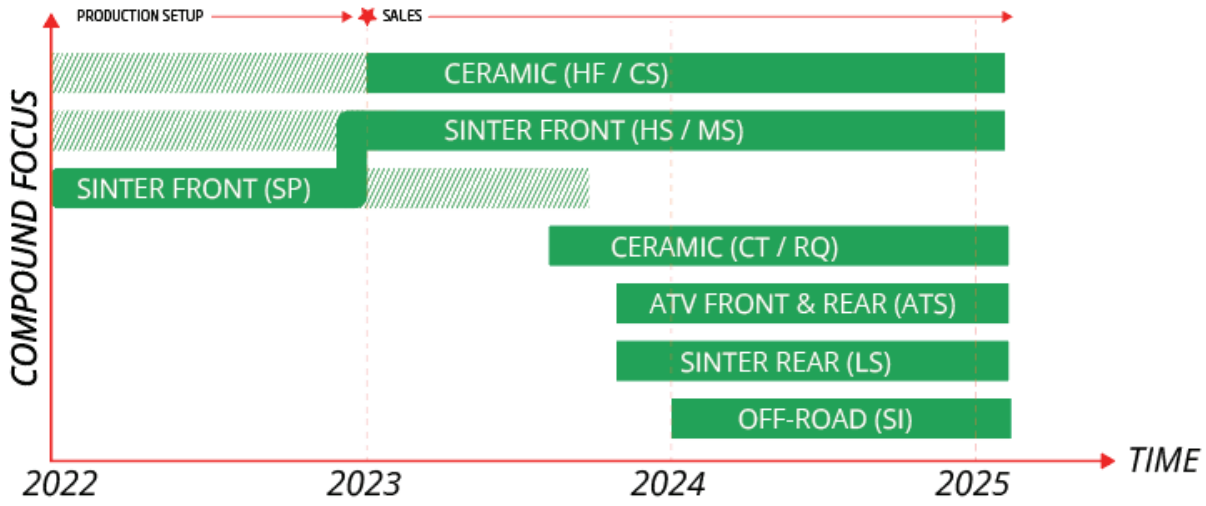

A fin de diferenciar los antiguos de los nuevos, SBS ha introducido el simbólico icono "Better Brakes" en su embalaje. Esto también permitirá que las referencias de los productos (p. ej., 706HS o 146MS) sigan siendo las mismas que hoy para mayor comodidad de los conductores, concesionarios y distribuidores por igual.

FASE DE TRANSICIÓN

Los primeros productos que pasarán a ser SBS Better Brakes son los HF, HS y MS. La productos SP dejarán de fabricarse a partir del 1 de enero de 2023. Todas las referencias de productos SP se fusionarán con las referencias HS, facilitando de este modo la selección de productos preferentes, que pasará a realizarse en función del principio 'bueno-mejor-el mejor'.

A mitad de 2023, los siguientes en realizar la transición son los productos RQ y CT, seguidos de los productos LS, cuya transición tendrá lugar en 2024.

TRANSITION TIMELINE
Better Brakes

** Compounds can contain dust particles that may or may not contain levels of Copper, Nickel and Antimony. The compound terminology does not include backing plate coatings.*

** Los compuestos pueden contener partículas de polvo que podrían, o no, contener niveles de cobre, níquel y antimonio. La terminología de compuestos no incluye los recubrimientos de las placas de freno.*

NEW!
SBS BETTER BRAKES

IMPROVED PERFORMANCE CHARACTERISTICS

With SBS you can expect Braking Excellence, including the new SBS Better Brakes. Nothing less.

Improved stopping power (graph 1)
SBS Better Brakes enable better maneuverability in emergency situations. The metallics in the compounds enable an improved Coefficient of Friction that results in a more efficient brake grip throughout the braking sequence. The effect is an improved stopping power of up to 12% in braking distances.

Performance rating (graph 2)
Riders can expect a similar wear profile and an overall improved sense of grip and performance stability throughout the temperature spectrum. This means that riders can expect a 1:1 responsiveness between lever grip and speed reduction.

Heat performance (graph 3)
The new SBS Better Brakes compound has been designed to maintain performance even in intense braking situations. The average commuter most often brakes in a heat spectrum 100 - 300 degrees of the disc. The average riders can expect a consistent braking experience throughout the ride, throughout the heat range.

Fade Performance (graph 4)
Riders can expect an improved performance at the beginning of and throughout the ride, despite the heating up of the brake system. Riders will also get an improved grip feeling and an improved initial bite when braking.

¡NUEVO!
SBS BETTER BRAKES

CARACTERÍSTICAS DE RENDIMIENTO MEJORADO

Los productos SBS ofrecen 'Excelencia de frenado', y eso también incluye a los nuevos SBS Better Brakes. Nada menos.

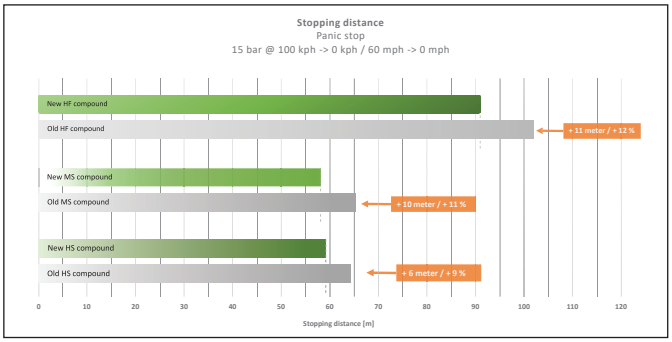

Potencia de detención mejorada (gráfico 1)
SBS Better Brakes permite mejorar la maniobrabilidad en situaciones de emergencia. La composición metálica de los compuestos permite mejorar el coeficiente de fricción, lo que genera un agarre más eficiente del freno a lo largo de toda la secuencia de frenado. El resultado es una potencia de detención optimizada equivalente al 9-12 % en distancias de frenado.

Índice de rendimiento (gráfico 2)
Los conductores experimentarán una resistencia al desgaste parecida, pero con una sensación de agarre y una estabilidad de rendimiento ampliamente mejoradas a lo largo del espectro de temperaturas. Esto significa que los conductores experimentarán un coeficiente de respuesta 1:1 entre el agarre de la palanca y la reducción de la velocidad.

Rendimiento térmico (gráfico 3)
El nuevo compuesto SBS Better Brakes ha sido diseñado para mantener el rendimiento incluso en situaciones de frenado intenso. El conductor medio suele frenar en un espectro térmico del disco de entre 100 y 300 grados, lo que significa que experimentará un frenado consistente a lo largo de toda la conducción y de toda la gama térmica.

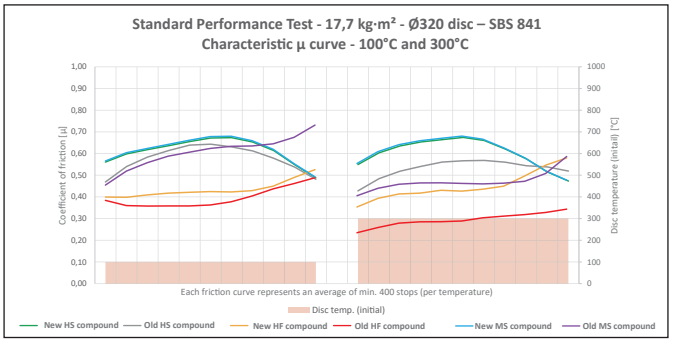

Rendimiento antifundido (gráfico 4)
Los conductores experimentarán un rendimiento mejorado tanto al principio como durante la conducción, independientemente del calentamiento del sistema de frenos. Los conductores también tendrán una sensación de agarre general optimizada y de un primer agarre inicial mejorado en el momento de frenar.

Improved stopping power (graph 1)

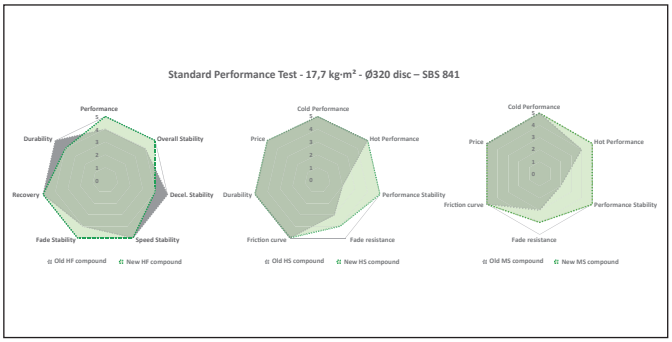

Brake length HS + HF + MS vs. old

Heat performance (graph 3)

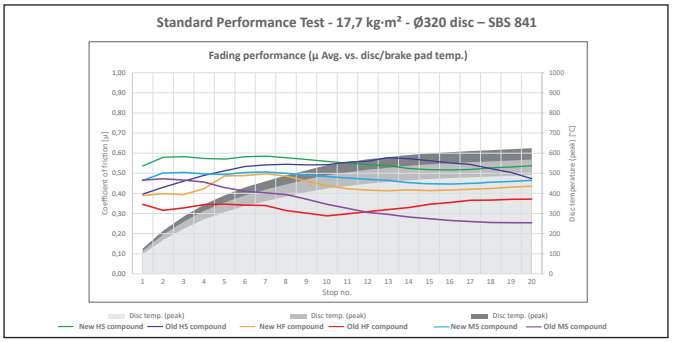

Heat performance HS + HF + MS vs. old

Performance rating (graph 2)

Performance rating HS + HF + MS vs. old

Fade Performance (graph 4)

UNIQUE TECHNOLOGY FEATURES

NRS TECHNOLOGY (NUCAP RETENTION SYSTEM)

SBS is 100% NRS SAFE! SBS conductive and sintered brake pads are all enforced with the premiere bonding technology in the market, NRS. The NUCAP Retention System (NRS) is a patented process where the backing plate surface is modified with a matrix of steel hooks that facilitate an indestructible mechanical bond between brake pad backing plate and the friction material, without any use of adhesives.

The main advantages of NRS technology compared to traditional bonding methods are:

// No separation between backing plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and backing plate

ALSO FOR RACING

As the only manufacturer of racing pads, SBS has since the introduction of DC Dual Carbon in 2001 and DS Dual Sinter in 2007 used NRS technology for both the carbon and the sinter-based compounds. A special version of NRS have been developed to match the performance expectations of SBS brake pads for racing.

THE IDENTIFIER

Products with NRS can be identified with the NRS badge on the lower part of the packaging.

CARACTERÍSTICAS TECNOLÓGICAS ÚNICAS

NRS TECHNOLOGY (NUCAP RETENTION SYSTEM)

¡SBS implementa la tecnología NRS 100 % segura! Las pastillas de freno conductoras y sinterizadas están totalmente reforzadas con la tecnología de unión NRS, la más avanzada del mercado. El sistema de retención NUCAP (NRS) es un proceso patentado en el que la superficie de la placa de soporte se ha modificado con una matriz de ganchos de acero que facilitan una unión mecánica indestructible entre la pastilla de freno y el material de fricción, sin necesidad de usar ningún tipo de adhesivos.

En comparación con los métodos de unión tradicionales, las ventajas principales de la tecnología NRS son:

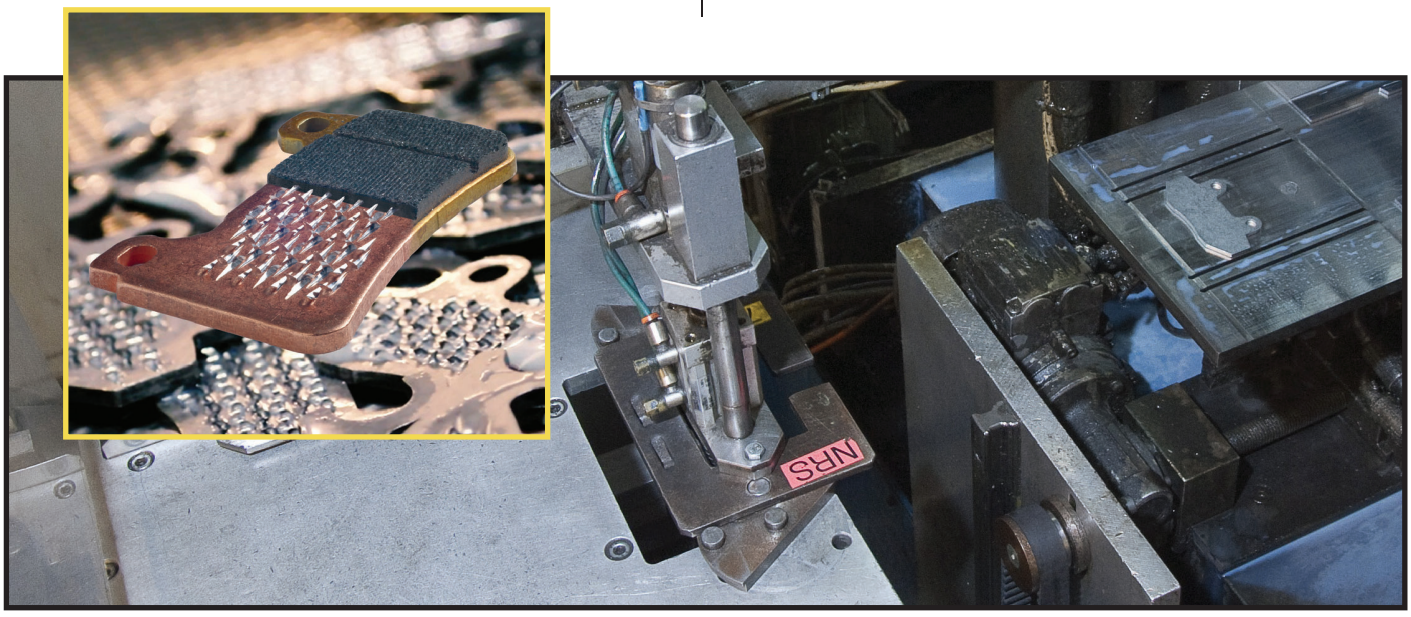

// No hay separación entre la placa de soporte y el material de fricción
// El material de fricción no presenta bordes elevados que generen sensación de palanca firme
// No hay vibraciones entre el material de fricción y la placa de soporte

TAMBIÉN PARA COMPETICIÓN

Como único fabricante de pastillas para competición, desde la introducción del Doble Carbono (DC) en 2001 y la Doble Sinterización (DS) en 2007, SBS ha empleado la tecnología NRS para los compuestos tanto de carbono como de base sinterizada. Se ha desarrollado una nueva versión de NRS capaz de responder a las expectativas de rendimiento de las pastillas de freno SBS para competición.

EL IDENTIFICADOR

Los productos con tecnología NRS pueden identificarse como tal gracias al distintivo NRS situado en la parte inferior del embalaje.

LICENSE TO ADVENTURE
#STREETMOTORCYCLE

If a street bike is your favorite. If you are dedicated to touring and adventures on weekends and holidays. If you enjoy the freedom of motorcycle riding. Or if you are commuting every day.

Then SBS STREET brake pads are the right choice for you. Our STREET compounds are developed to match all makes, models and year of street bikes on the market – front and rear.

All brake pads are ECE R90 approved.

They give you the performance, durability and comfort that you need to GO AHEAD.

Choose between:
// PERFORMANCE – HS / LS
// STANDARD – HF

Follow our recommendations for the ideal pads for your bike.

Si prefiere la motocicleta de calle. Si reserva los fines de semana y las vacaciones para el turismo y la aventura. Si disfruta de la libertad que da pilotar una motocicleta. O si utiliza la motocicleta a diario.

Entonces, las pastillas de freno SBS STREET son perfectas para usted. Nuestros compuestos STREET se adecuan a motocicletas de calle de todas las marcas, modelos y años que hay en el mercado, sin excepción.

Todas las pastillas de freno tienen la homologación ECE R90.

Ofrecen el rendimiento, la duración y el confort que necesita para SEGUIR ADELANTE.

Puede elegir entre:
// PERFORMANCE – HS / LS
// STANDARD – HF

Para acertar con las pastillas de su motocicleta, siga nuestras recomendaciones.

PERFORMANCE

HS - SINTER

FRONT / DELANTE

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport, big touring and adventure bikes
// Sintered compound formulated for low wear, high thermal stability, excellent brake feel and easy modulation
// HH rated performance, developed in racing and fine-tuned for street use
// Excellent for stainless steel or cast iron brake rotors
// Front (HS) and rear (LS) compounds for ideal brake balance, to avoid over-braking of rear-wheel
// Part of the new SBS Better Brakes transition

// Compuesto de recambio original y mejorado para motocicletas con pastillas sinterizadas
// Diseñado para utilizarse en motocicletas modernas de altas prestaciones, deportivas, gran turismo y adventure
// Compuesto sinterizado formulado para garantizar poco desgaste, alta estabilidad térmica, excelente sensación de frenado y fácil modulación
// Líder en el sector y alto rendimiento, desarrollado en competición y adaptado para el uso en la calle
// Excelente para rotores/discos de freno de acero inoxidable o hierro fundido
// Compuestos delantero (HS) y trasero (LS) que permiten un reparto de la frenada perfecto para evitar el bloqueo de la rueda trasera
// Parte de la nueva transición SBS Better Brakes

Brake performance diagrams to be compared individually within STREET compounds only.

LS - SINTER

REAR / POSTERIOR

// OE replacement compound for bikes with sintered pads
// Designed for modern high performance, sport and big touring bikes
// Sintered compound offering predictable and controllable performance for rear wheel use
// Exclusive rear wheel compound formulated according to OEM concept offering ideal front/rear brake balance, to avoid over-braking of rear-wheel
// Part of the new SBS Better Brakes transition

// Compuesto de recambio original para motocicletas con pastillas sinterizadas
// Diseñado para utilizarse en motocicletas modernas de altas prestaciones, motocicletas deportivas y gran turismo
// Compuesto sinterizado que ofrece resultados predecibles y controlables en la rueda trasera
// Exclusivo compuesto para la rueda trasera formulado según el concepto del fabricante original, que ofrece un perfecto reparto de la frenada entre la parte delantera y la trasera para evitar frenadas bruscas y el bloqueo de la rueda trasera
// Parte de la nueva transición SBS Better Brakes

Diagramas de potencia de freno para comparar de forma individual los compuestos de STREET exclusivamente.

STANDARD

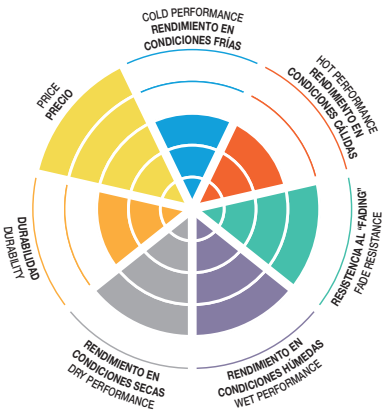

HF - CERAMIC

FRONT / DELANTE • REAR / POSTERIOR

// OE replacement compound for bikes with non-sintered pads
// Designed for commuters, general-purpose street and cruiser bikes
// Ceramic compound offers long pad life, low dust and low brake rotor wear
// Excellent, consistent performance in wet and dry conditions
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Innovative noise-reduction technology for high comfort and low development of noise
// Part of the new SBS Better Brakes transition

// Compuesto de recambio original para motocicletas con pastillas no sinterizadas
// Diseñado para motocicletas urbanas, motocicletas de calle polivalentes y cruisers,
// Compuesto cerámico que garantiza una larga duración de la pastilla, poco polvo y un menor desgaste del rotor/disco de freno
// Prestaciones excelentes y uniformes tanto en seco como en mojado
// Tecnología NUCAP NRS que garantiza una adherencia mecánica e indestructible del compuesto
// Innovadora tecnología de reducción del ruido que mejora el confort y reduce la emisión de ruido
// Parte de la nueva transición SBS Better Brakes

LICENSE TO FREEDOM
#VTWIN

If you have a passion for the American lifestyle, and the unique design and characteristics of the famous American motorcycle brands such as Harley Davidson, Victory and Indian, then SBS has the answer to your brake needs.

Our range of brake pads developed especially for American-made motorcycles features compounds that unite high power with low noise and long lifetime. Our range has full coverage - vintage models back from the 80s as well as brand new American-built bikes.

All brake pads are ECE R90 approved.

Choose between:
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Follow our recommendations for the ideal pads for your bike.

Si le apasiona el estilo de vida americano y el diseño y las características exclusivas de marcas de motocicletas tan legendarias como Harley Davidson, Buell e Indian, SBS tiene los frenos que necesita.

Nuestra gama de pastillas de freno creada especialmente para las motocicletas americanas incorpora compuestos que combinan alta potencia con poco ruido y larga vida útil. Nuestra gama abarca tanto los modelos clásicos de la década de 1980 como los modelos más modernos de motocicletas americanas.

Todas las pastillas de freno tienen la homologación ECE R90.

Puede elegir entre:
// HIGH PERFORMANCE & NO DUST – H.HS / H.LS
// HIGH POWER & NOISE REDUCTION FORMULA – H.CT
// ULTRA QUIET & LOW DUST – H.HF

Para acertar con las pastillas de su motocicleta, siga nuestras recomendaciones.

LICENSE TO HAVE FUN
#URBANMOBILITY

When it comes to city traffic, a scooter is often the ideal vehicle. In dense traffic you have to rely on your brakes. The SBS scooter brake pads offer the ideal brake performance and durability for this environment.

We offer different compounds for different kinds of scooters and riding needs. Our market coverage is wide with pads and compounds to fit small 50 cc models all the way to modern, high-performance maxi scooters.

Most brake pads are ECE R90 approved.

Choose between:
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Follow our recommendations for the ideal pads for your scooter.

El scooter suele ser el vehículo perfecto para desplazarse por la ciudad. Con tráfico denso, es esencial disponer de unos frenos fiables. Las pastillas de freno para scooter de SBS ofrecen unas prestaciones de frenado y una durabilidad perfectas en ciudad.

Ofrecemos compuestos diferentes que se adecuan a la mayoría de los tipos de scooter y de las necesidades de conducción. Tenemos una oferta comercial amplia que incluye pastillas y compuestos para diferentes modelos, desde scooters pequeños de 50 cc hasta maxi scooters modernos de altas prestaciones.

La mayoría de las pastillas de freno tienen la homologación ECE R90.

Puede elegir entre:
// MAXI SINTER – MS
// STANDARD & MAXI – CT
// STANDARD & MAXI – HF

Para acertar con las pastillas de su scooter, siga nuestras recomendaciones.

DOMINIQUE AEGERTER

For more than 25 years racing has been part of our DNA.

Through our Partners in Racing concept, we deliver the stopping power to the best of the best in racing. Whether it comes to international top level road racing such as World Superbike, Supersport , Endurance, The Isle of Man TT, National competitions, track days or classic road racing, SBS offers you the brake pads you need for gaining that important 100th of a second over the competition. Our race compounds are specially developed for competition and race track use – tested and approved by some of the best World Championship riders.

Full blood race pads cannot be ECE R90 approved. All racing pads other than LS are enforced with NUCAP NRS technology.

Choose between:
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RST
// RACING REAR – RQ / LS

Follow our recommendations for the ideal pads for your bike.

Las carreras forman parte de nuestro ADN desde hace más de 25 años.

A través de nuestros colaboradores del Racing concept, ofrecemos potencia de frenado a los mejores pilotos de competición del mundo. Ya se trate carreras internacionales de primer nivel, como Superbike, Supersport o Endurance, competiciones nacionales, tandas en circuito o carreras clásicas en carretera, SBS ofrece pastillas de freno con las que se pueden ganar centésimas de segundo importantes durante la frenada. Nuestros compuestos de carreras se han desarrollado especialmente para el uso en competición y en circuitos de carreras. Han sido probados y aprobados por algunos de los mejores pilotos del Campeonato del Mundo.

Las pastillas de carreras no pueden tener la homologación ECE R90. Salvo LS, todas las pastillas de carreras se realizan con tecnología NUCAP NRS.

Puede elegir entre:
// DYNAMIC RACING CONCEPT – DS-1 & DS-2
// ROAD RACING & CLASSIC RACING – DC / DCC
// ROAD RACING & TRACK DAYS – RST
// RACING REAR – RQ / LS

Para acertar con las pastillas de su motocicleta, siga nuestras recomendaciones.

PROFESSIONAL RACING

DS-1 & DS-2
DYNAMIC RACING CONCEPT

FRONT / DELANTE - FOR RACE USE ONLY

// The choice of numerous World Champions in Superbike, Supersport, Moto2 and Endurance
// High-tech sintered compound available for racing & standard brake systems used in racing
// DS-1 with an aggressive initial bite features and linear predictable in-stop performance
// DS-2 with a smooth initial bite and progressive in-stop performance
// A combination (left and right) of the two compounds makes fine tuning of braking performance possible
// NUCAP NRS technology secures mechanical bonding

// La alternativa elegida por numerosos campeones del mundo de Superbike, Supersport, Moto2 y Resistencia
// Compuesto sinterizado de alta tecnología disponible para sistemas de frenos de carreras y convencionales que se usan en competición
// DS-1: Si se prefiere una fuerte mordida inicial y un rendimiento gradual
// DS-2: Si se prefiere una mordida inicial suave y un rendimiento progresivo
// Ahora es posible combinar los dos compuestos: Disco de freno izquierdo DS-1 y disco de freno derecho DS-2. Esto ofrece una combinación de las diferentes características de rendimiento de los dos compuestos. En definitiva, un ajuste fino del rendimiento de frenado según las preferencias de frenado de cada piloto
// Tecnología NUCAP NRS que garantiza una adherencia mecánica e indestructible del compuesto

Brake performance diagrams to be compared individually within RACING compounds only.

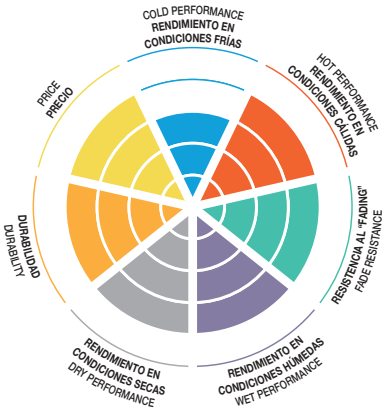

DC - DUAL CARBON

FRONT / DELANTE - FOR RACE USE ONLY

// The upgrade choice for Superbike, Supersport and Superstock racers in National Championship as well as for Track Day riders
// High-tech carbon compound developed for racing and standard brake systems used for race and sport bikes
// Low heat transfer rate protects brake system and brake fluid against extreme temperatures
// Smooth initial bite, progressive in-stop performance with excellent brake lever feel and modulation
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bond between the compound and backing plate
// Laser cut backing plate to prevent deformation

// La alternativa mejorada para pilotos de Superbike, Supersport y Superstock que corren en campeonatos nacionales así como para las tandas en circuitos
// Compuesto de carbono de alta tecnología desarrollado para sistemas de frenos de carreras y convencionales que se utilizan en motocicletas de carreras y deportivas
// Bajo coeficiente de transferencia de calor que protege el sistema de frenos y el líquido de frenos frente a las temperaturas extremas
// Mordida inicial suave y rendimiento en parada progresivo con modulación y sensibilidad excelentes en la maneta de freno
// Uso de la tecnología DEST para lograr el preasentamiento del componente con el fin de evitar el desgaste y garantizar un rendimiento constante
// Tecnología NUCAP NRS que garantiza una adherencia mecánica e indestructible del compuesto

Diagramas de potencia de freno para comparar de forma individual los compuestos de RACING exclusivamente.

ENDURANCE, CLASSIC RACING & ROAD RACING / ROAD RACING & TRACKDAYS

RACING
CLASSIC ROAD RACING

DCC - DUAL CARBON

FRONT / DELANTE - FOR RACE USE ONLY

// The choice for classic road racing derived from more than 25 years of experience in World Championship racing and inspired by our championship winning DC Dual Carbon material
// Smooth initial bite, ideal for classic front fork construction and tires. Progressive brake performance offering superior power and front-end feel
// Thermal stability, suitable for single or dual rotor set-up. Compatible with stainless steel and cast iron brake rotors
// Low thermal conductivity reduces thermal load to seals, brake fluid and caliper parts
// DEST technology used for pre-bedding of the compound to eliminate fade and secure consistent performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Laser cut backing plate to prevent deformation

// La elección para carreras clásicas en carretera gracias a los más de 25 años de experiencia en el Campeonato del Mundo e inspirada en nuestro material DC (Dual Carbon), ganador del mundial
// Mordida inicial suave, ideal para la configuración clásica de horquilla delantera y las llantas Prestaciones de frenado progresivas con mayor potencia y mejor tacto en la rueda delantera
// Estabilidad térmica, adecuada para la configuración de 1 y 2 discos Compatible con discos de freno de hierro fundido y acero inoxidable
// Escasa conductividad térmica que reduce la carga térmica en las juntas, el líquido de frenos y las pinzas de freno
// Uso de la tecnología DEST para lograr el preasentamiento del componente con el fin de evitar el desgaste y garantizar un rendimiento constante
// Tecnología NUCAP NRS que garantiza una adherencia mecánica e indestructible del compuesto

Due to the unique nature of the DCC compound, formulated especially for vintage racing, it is not possible to compare to other products.

El carácter singular del compuesto DCC no permite compararlo con otros productos, ya que se trata de un compuesto formulado especialmente para coches clásicos de carreras.

ECE R90

RST - SINTER

FRONT / DELANTE

// The ideal and affordable choice for track days and club racing. Can be used for street riding
// Sintered compound available for modern sportbike standard brake systems
// Excellent for stainless steel or cast iron brake rotors
// Strong initial bite, linear in-stop performance with good brake feel and control

As of 2020 the RST range replaced RS pads 1:1, when it comes to specializing applications. However, with increased braking power and even better brake feel and control. Riders just have to be aware of a slightly increased bedding-in time compared to RS due to the increased durability. All RST pads are enforced with NRS. The NRS (Nucap Retension System) is an advanced mechanical bonding technology based on a matrix of steel hooks raised from the backing plate steel material. The NRS hooks mold into the friction material creating an indestructible and corrosion safe mechanical bond without any use of adhesives. Main advantages of NRS technology:
// No separation between the back plate and friction material
// No lifting edges of the friction material giving a firm lever feel
// No vibration between the friction material and back plate

// La elección perfecta y económica para las tandas en circuito y para motocicletas mixtas para circuito y carretera
// Compuesto sinterizado disponible para los modernos sistemas de frenos convencionales de las motocicletas de competición y deportivas
// Excelente para rotores/discos de freno de acero inoxidable o hierro fundido
// Mordida inicial enérgica y rendimiento en parada gradual con buena sensación y control de frenado

A partir de 2020, la gama RST ha reemplazado a las pastillas RS 1:1 en cuanto a adaptación de aplicaciones. Sin embargo, ofrece mayor potencia de frenado e incluso mejor sensación y control de frenado. A los pilotos les basta saber que el tiempo de asentamiento es ligeramente mayor que en el caso de RS debido a la elevada durabilidad. Todas las pastillas RST se realizan con NRS. NRS (Nucap Retention System) es una tecnología de adherencia mecánica avanzada que se basa en una matriz de ganchos de acero construida a partir del material de acero de la placa posterior. Los ganchos NRS se adaptan al material de fricción y crean una unión mecánica anticorrosión e indestructible sin el uso de adhesivos. Principales ventajas de la tecnología NRS:
// Ausencia de separación entre la placa posterior y el material de fricción
// Ausencia de deformación de los bordes del material de fricción que proporciona sensación de firmeza
// Ausencia de vibración entre el material de fricción y la placa posterior

ENDURANCE, CLASSIC RACING & ROAD RACING

RQ - CARBON TECH

REAR / POSTERIOR

// Rear brake carbon compound with high brake performance
// Excellent feel and control to use rear brake steering into turns and handle the bike out of turns
// Part of the new SBS Better Brakes transition

// Compuesto de carbono para el freno trasero con altas prestaciones de frenado
// Sensación y control excelentes para gestionar la frenada en curvas
// Parte de la nueva transición SBS Better Brakes

LS - SINTER

REAR / POSTERIOR

// Rear brake sintered compound with medium brake performance and long pad life
// Recommended for riders using the rear brake occasionally or only slightly entering the turns
// Part of the new SBS Better Brakes transition

// Compuesto sinterizado para el freno trasero con prestaciones de frenado de nivel medio y larga duración de la pastilla
// Recomendado para pilotos que utilizan el freno trasero de manera esporádica o ligeramente al entrar en curvas
// Parte de la nueva transición SBS Better Brakes

LICENSE TO ACTION
#OFFROADBIKE

Enjoying the freedom in the desert. Conquering rocks and mountains. Racing down the dirt track for podium positions.

When riding off road is your passion, SBS offers you the ideal brake compound for the aggressive environment of sand, dust, mud and water. Whether on motorcycle, ATV or UTV.

Choose between our racing pads for competition at all levels or the alternatives when riding off road for leisure and fun. Our range covers all off road makes and models and of course for both front and rear applications.

Most brake pads are ECE R90 approved.

Choose between:
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Follow our recommendations for the ideal pads for your bike.

Disfrutar de la libertad en el desierto. Conquistar colinas y montañas. Recorrer pistas de tierra a gran velocidad para llegar a lo más alto en las competiciones.

Si su pasión es el off-road, SBS ofrece el compuesto de freno ideal para entornos agresivos con gran cantidad de arena, polvo, barro y agua. En motocicleta, ATV o UTV.

Puede elegir pastillas de carreras para competir a todos los niveles o bien pastillas alternativas para salidas de ocio. Nuestra gama cubre todas las marcas y modelos todoterreno, así como las aplicaciones delantera y trasera.

La mayoría de las pastillas de freno tienen la homologación ECE R90.

Puede elegir entre:
// UPGRADE & RACING – RSI / PSI
// CLUB, TRAILS & LEISURE – SI / CS / ATS

Para acertar con las pastillas de su motocicleta, siga nuestras recomendaciones.

SI - SINTER

FRONT / DELANTE • REAR / POSTERIOR

// The upgrade choice for muddy, wet or sandy conditions
// Sintered compound formulated for extended service intervals, high performance and easy modulation
// Class-leading smooth performance developed in racing under severe conditions
// Part of the new SBS Better Brakes transition

// La alternativa moderna para lugares con mucho barro, humedad o arena
// Compuesto sinterizado formulado para ofrecer largos periodos de vida útil, alto rendimiento y fácil modulación
// Rendimiento estable de primer nivel desarrollado en carrera en condiciones rigurosas
// Parte de la nueva transición SBS Better Brakes

Diagramas de potencia de freno para comparar de forma individual los compuestos de OFF ROAD exclusivamente.

CLUB, TRAILS & LEISURE

PSI - EVO SINTER

FRONT / DELANTE • REAR / POSTERIOR

// Ultimate upgrade compound for ATVs and UTVs
// State-of-the-art conductive sintered EVO compound formulated for strong initial bite to give instant brake feeling, easy modulation and powerful in-stop performance
// Fade free, consistent and reliable performance under extreme conditions and throughout brake pad lifetime
// NRS Technology secures a mechanical and indestructible bonding of the compound
// Full-range availability completed Q1 2021

// Compuesto de recambio original y mejorado para ATV y UTVs
// Compuesto EVO con sinterizado conductivo de vanguardia, formulado para lograr una mordida inicial enérgica con sensación inmediata de frenado, fácil modulación y altas prestaciones en las paradas
// Resistente al desgaste con rendimiento constante y fiable en condiciones de conducción extremas y durante toda la vida útil de la pastilla de freno
// Tecnología NRS que garantiza una adherencia mecánica e indestructible del compuesto
// Disponibilidad de la gama completa en el primer trimestre de 2021

Brake performance diagrams to be compared individually within OFF ROAD compounds only.

ATS - SINTER

FRONT / DELANTE • REAR / POSTERIOR

// OE replacement compound for combination with plain steel brake rotors
// Sintered compound compatible with OE standard plain steel brake rotors as used with older Arctic Cat & Polaris ATV models
// Part of the new SBS Better Brakes transition

// Compuesto de recambio original para combinar con discos de freno de acero normales
// Compuesto sinterizado compatible con modelos originales de discos de freno de acero normales, como los que se emplean en los modelos ATV Arctic Cat y Polaris ATV
// Parte de la nueva transición SBS Better Brakes

CS - CARBON

FRONT / DELANTE • REAR / POSTERIOR

// Affordable replacement choice for hobby motocross and competition
// Carbon compound offers smooth, quiet and non-grabbing performance
// NUCAP NRS technology secures a mechanical and indestructible bonding of the compound
// Part of the new SBS Better Brakes transition

// Alternativa de recambio económica para competición y aficionados al motocross
// Compuesto de carbono con funcionamiento suave, silencioso y sin agarrotamiento
// Tecnología NUCAP NRS que garantiza una adherencia mecánica e indestructible del compuesto
// Parte de la nueva transición SBS Better Brakes

BRAKE SHOES WITH SPRINGS

ZAPATAS DE FRENO CON MUELLES

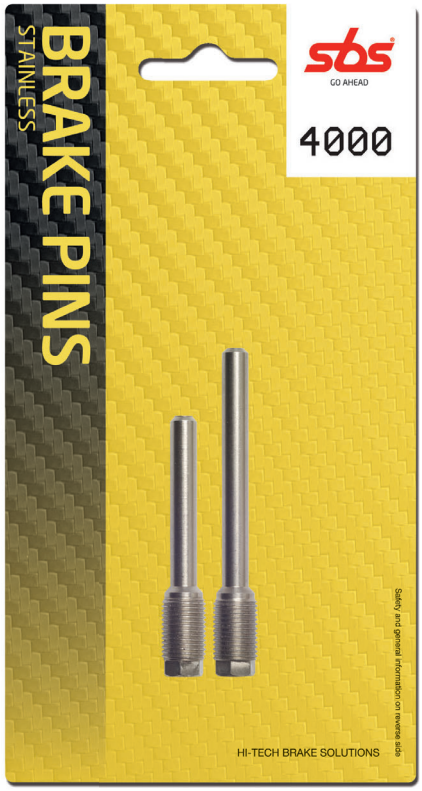

Asbestos-free brake lining for superior performance and durability under all weather conditions. High grade alloy for superior strength. Surface treated against corrosion. Brake shoe springs made of high quality spring wire steel according to DIN 17223 specifications for max. flexibility.

Guarnición de freno sin amianto que ofrece un resultado y una durabilidad superiores en cualquier clima Aleación de aluminio de alta calidad con resistencia superior Superficie con tratamiento anticorrosión Muelles realizados con alambre de acero de alta calidad conforme con las especificaciones DIN 17223 para una flexibilidad máxima.

STAINLESS BRAKE PINS

TORNILLOS DE FRENO INOXIDABLES

The SBS stainless brake pin range covers the most common MX and Enduro bikes from the early 1990s until today.

The range comprises 5 complete sets, front and rear together, but are also available as single packs with only front or rear to the respective model. Brake pad pins get wear grooves after a while so it is recommended to replace them regularly in order to prevent stiction and poor performance.

// Made of high quality stainless steel 304
// 8 mm hex head for quick and easy change of brake pad (excl. ref 4003)
// Corrosion resistant
// Smooth sliding between pin and brake pads

La serie de tornillos de freno inoxidables de SBS cubre las gamas de motocicletas MX y Enduro más comunes que aparecieron en la década de 1990 y que siguen existiendo en la actualidad.

La gama incluye 5 juegos completos de tornillos delanteros y traseros, pero también hay disponibles paquetes individuales (solo con tornillos delanteros o solo con traseros) específicos para cada modelo. Los tornillos de las zapatas de los frenos presentan grietas de desgaste después de un tiempo, por lo que se recomienda sustituirlos de forma periódica para evitar problemas de fricción estática y escaso rendimiento.

// Realizados en acero inoxidable 304 de alta calidad
// Cabeza hexagonal de 8 mm para un cambio rápido y fácil de la zapata del freno (excl. ref 4003)
// Anticorrosión
// Acoplamiento suave entre tornillos y zapatas de freno

ACCESSORIES

BRAKE SYSTEM BLEEDER

Motorcycle brake system bleeder which allows quick, safe and clean exchange of brake fluid. Access to min. 6 bar air pressure is necessary. The bleeder is made of the best and most durable brake fluid resistant materials which means that it handles the highly corrosive brake fluid in a closed circuit. A special safety and “tip-over” valve, prevents the fluid to leak out when the container is full.

// Built-in ”tip-over” valve
// Turnable line fitting
// Additional 2-nipple line included
// Manual in 12 languages

Part number 5809839100
EPDM rubber units
Art. number 5809939100 (10 pcs.)

PURGADOR DE FRENOS

Purgador del sistema de frenos de la motocicleta que permite cambiar el líquido de freno de forma rápida, limpia y segura. Se requiere una presión del aire mínima de 6 bar. El purgador de frenos está realizado con los materiales mejores y más resistentes al líquido de freno: el líquido, que es muy corrosivo, se mantiene en un circuito cerrado. Una válvula de seguridad especial y “antivuelco” impide la pulverización del líquido cuando el recipiente está lleno.

// Válvula “antivuelco” incorporada
// Llave giratoria
// Conducto adicional de doble boquilla incluido
// Manual en 12 idiomas

N.º de pieza 5809839100
Unidades de caucho EPDM
N.º art. 5809939100 (10 uds.)

ACCESORIOS

ANTI-NOISE SHIMS

// Vibration/noise resistant
// Temperature transfer resistant
// Piston protective
// Do not use for racing

Part number 9500

CUÑAS DE PASTILLAS DE FRENO

// Resistente a vibraciones/ruidos
// Resistente a la transferencia del calor
// Ideal para proteger el pistón
// Mejor sensación de frenado
// No utilizar en carreras

N.º de pieza 9500 (uds.)

HI-TECH BRAKE SOLUTIONS
MADE IN EUROPE

@sbsbrakes . sbsbrakes . #GoAhead

HI-TECH BRAKE SOLUTIONS MADE IN EUROPE

At SBS, we develop and manufacture hi-tech brake solutions.

Our ranges of brake pads, brake rotors, brake shoes, clutch kits and other important parts cover all relevant motorcycles, scooters and ATV/UTVs on the market, regardless of make and model. SBS is your single source for brake parts and components.

We are a global market leader within brakes for powered two-wheelers. Our R&D department continuously innovates with new materials and technologies to achieve ultimate performance, longer lifetime, higher comfort and more eco-friendly products.

Our products are tested by reality. Dynamometer testing is supplemented with numerous street and race track tests. We work with some of the world's best road racing and motocross riders, when they race towards podium positions.

We create the power to stop you. Made in Europe. You decide where and how to use it. Go Ahead!
